

Aide memoire May 2024 AstraZeneca PLC Eastbrook House, Shaftesbury Rd, Cambridge CB2 8BF, U.K. T: +44 (0)203 749 5501 astrazeneca.com

To whom it may concern,

This letter sets forth public information previously provided by AstraZeneca and others which may prove helpful in estimating the financial performance following AstraZeneca's Q1 2024 results.

Sell-side analysts who wish to contribute to company-collected consensus estimates are requested to submit updated numbers by **Wednesday 8 May 2024**; details are provided in the appendix. As usual, those analysts who contribute will automatically receive the consensus data in return.

AstraZeneca would like to highlight the following important considerations and prior disclosures:

1. 2024 guidance at constant exchange rates (CER)

AstraZeneca reiterated its FY2024 guidance when announcing Q1 2024 results on 25 April 2024. Total Revenue is anticipated to increase by a low double-digit to low teens percentage at constant exchange rates. Core EPS is also anticipated to increase by a low double-digit to low teens percentage. Collaboration Revenue is expected to increase substantially, driven by success-based milestones and certain anticipated transactions. Other operating income is expected to decrease substantially (FY2023 included a \$241m gain on the disposal of *Pulmicort* Flexhaler US rights, and a \$712m one-time gain relating to updates to contractual arrangements for *Beyfortus*). A Core tax rate of 18%-22% is anticipated.

If average March 2024 FX rates were to remain for the reminder of the year, a low single-digit adverse FX impact is anticipated for Total Revenue and a mid single-digit adverse impact is anticipated for Core EPS (previously low single-digit).

Variations in performance between quarters can be expected to continue.

2. Revenue - sales

2.1 Product Sales

It was clarified on the FY23 earnings call that Product Sales growth in FY24 is anticipated to be within the guidance range provided for Total Revenue.

2.2 Oncology

Tagrisso faced a mandatory price reduction in Japan in June 2023. In September 2023, the US FDA restricted *Lynparza's* 2L+ ovarian indication to the germline or somatic BRCA-mutated patient population. As expected, *Faslodex* was included in the ninth batch of volume-based procurement which was announced in China in November 2023. Effective 1st February 2024, *Imfinzi's* price in Japan has been reduced by 25% and as mentioned on the FY2023 earnings call, an additional mandatory price reduction is anticipated later this year based on recent fixed dosing approvals. As announced at Q1 results, *Imfinzi* and *Imjudo* revenues will be reported separately going forward.

2.3 Respiratory and Immunology

Airsupra was launched in January 2024 and recorded \$7m of sales in Q1. As mentioned on the Q1 earnings call, revenues were not a reflection of underlying demand due to introductory discounts which will fade through the year as access is expanded.

2.4 Vaccines and Immune Therapies

As previously mentioned, the primary endpoint of the SUPERNOVA trial has been updated to measure the efficacy of a 300mg intramuscular dose of AZD3152. Development of AZD3152 is also dependent on recent and emerging Covid variants. Efficacy data is anticipated in Q2 2024.

2.5 China

In the latest NRDL update (effective 1 January 2024), *Lynparza* and *Tagrisso* had new indications added (PAOLA-1 and ADAURA respectively) with no associated price cuts. *Calquence* (r/r MCL), *Soliris* (PNH, aHUS and gMG), *Koselugo* and *Xigduo* were added for the first time with price cuts of 71.9%, 86.7%, 45.4% and 75.5% respectively vs. prior price in the private market. *Lokelma's* and roxadustat's prior NRDL listings were renewed. *Lokelma's* NRDL price remains the same as before whereas roxadustat's price will be seven percent lower than its previous NRDL price.

3. Revenue – other

3.1 Collaboration Revenue

At the time of writing, no significant transaction has been announced to be booked in Q2 2024.

4. Product Sales Gross margin

On the Q1 2024 earnings call, it was reiterated that the Company continues to anticipate that the Core Product Sales Gross Margin percentage will be slightly lower in 2024 vs. 2023 (81.7%) driven by higher sales in Emerging Markets and increased *Beyfortus* product supply to Sanofi. In addition, higher sales of partnered products (e.g. *Enhertu* and *Tezspire*) in regions where AstraZeneca book product sales and then pay out a profit share from cost of sales to partners will have a negative mix effect on the gross margin percentage.

5. Operating expenses

Total operating costs increased by 15% in Q1 2024. Quarterly variations in expenditure should be expected. Operating leverage continues to be a focus for the company.

6. Other operating income

At the time of writing, no material transactions have been announced to be booked in Q2 2024.

7. Mid-term Core EBIT Margin

The mid-term (2025/2026) margin ambition of a Core operating margin in the mid 30's % was reiterated on the FY23 earnings call. In line with previous comments, Core R&D expenses are anticipated to be in the low 20's % of Total Revenue.

8. Financing expenses

On 24 February 2023 it was <u>announced</u> that AstraZeneca had priced €750 million of fixed rate notes with a coupon of 3.625% maturing on 3 March 2027 and €750 million of fixed rate notes with a coupon of 3.750% maturing on 3 March 2032 (both bonds swapped into USD, blended rate ~4.9%). On 1 March 2023, AstraZeneca <u>announced</u> that it had priced \$1.1bn of fixed rate notes with a coupon of 4.875%, maturing 3 March 2028, \$650m of fixed rate notes with a coupon of 4.900%, maturing 3 March 2028, \$650m of fixed rate notes with a coupon of 4.900%, maturing 3 March 2028 it was <u>announced</u> that the company had priced a \$5bn bond offering; \$1.25bn of fixed rate notes with a coupon of 4.80% maturing 26 February 2027, \$1.25bn with a coupon of 4.85% maturing 26 February 2029. \$1bn with a coupon of 4.90% maturing 26 February 2031 and \$1.5bn with a coupon of 5.00% maturing 26 February 2034.

Core Finance expenses (including JVs) were \$984m in 2023 and it was mentioned on the FY2023 earnings call that these are anticipated to increase in 2024 (vs. 2023). Q1 2024 Core Finance expenses (including JVs) were \$258m.

9. Income tax

The UK corporation tax increased to 25% (from 19%) on 1 April 2023. The OECD framework (BEPS Pillar 2), with a global minimum effective tax rate for large multinational companies of 15% will be implemented in more jurisdictions in 2024. A Core Tax rate of 18-22% is anticipated for the full year.

10. Outstanding number of shares

The outstanding number of shares was 1,550,235,025 as of end April 2024.

11. Cash flow

Past Transactions:

The last payment (\$833m) to the former shareholders of Acerta was paid in Q1 2024.

In March 2019, AstraZeneca entered a collaboration with Daiichi Sankyo on *Enhertu*. AstraZeneca paid an upfront payment of \$1.35bn (half in 2019 and remaining part in 2020). In addition, there are potential contingent payments of up to \$5.55bn including \$3.8bn in regulatory milestones and \$1.75bn for sales-related milestones. For more details, please see <u>announcement</u>.

In July 2020, AstraZeneca and Daiichi Sankyo announced a collaboration on datopotamab deruxtecan. AstraZeneca will pay Daiichi Sankyo an upfront payment of \$1bn in staged payments: \$350m was paid in 2020, \$325m paid in 2021 and the last \$325m was paid in Q3 2022. AstraZeneca will pay additional conditional amounts of up to \$1bn for the successful achievement of regulatory approvals and up to \$4bn for sales-related milestones. For more details, please see the <u>announcement</u>.

Recent Transactions:

On 9 November 2023, AstraZeneca <u>announced</u> a license agreement for ECC5004, an investigational oral once-daily glucagon-like peptide 1 receptor agonist (GLP-1RA), with Eccogene. Under the terms of the agreement, Eccogene will receive an initial upfront payment of \$185m. In addition, Eccogene will also receive up to an additional \$1.825bn in future clinical, regulatory, and commercial milestones and tiered royalties on product net sales.

On 12 December 2023, AstraZeneca <u>announced</u> the acquisition of Icosavax Inc. for an upfront payment of \$0.8bn with a further \$0.3bn in potential future CVR payments. As of 30th September 2023, Icosavax had \$229m in cash and marketable securities on its balance sheet. The closure of the acquisition was <u>announced</u> on 19 February 2024.

On 27 December 2023, AstraZeneca <u>announced</u> the acquisition of Gracell Biotechnologies Inc. Under the terms of the definitive agreement, AstraZeneca will acquire all of Gracell's fully diluted share capital (including shares represented by ADSs) through a merger for a price of \$2.00 per ordinary share in cash at closing (equivalent to \$10.00 per ADS of Gracell) plus a non-tradable contingent value right of \$0.30 per ordinary share (equivalent to \$1.50 per ADS of Gracell) in cash payable upon achievement of a specified regulatory milestone. The upfront cash portion of the consideration represents a transaction value of approximately \$1.0bn. Combined, the upfront and potential contingent value payments represent, if achieved, a transaction value of approximately \$1.2bn. AstraZeneca will acquire the cash, cash equivalents and short-term investments on Gracell's balance sheet, which totalled \$234.1m as of 30th September 2023. The closure of the transaction was <u>announced</u> on 22 February 2024.

On March 14 2024, AstraZeneca <u>announced</u> the acquisition of Amolyt Pharma. Under the terms of the agreement, AstraZeneca will acquire all of Amolyt Pharma's outstanding shares for a total consideration of up to \$1.05 billion, on a cash and debt free basis. This includes \$800 million upfront at deal closing, plus the right for Amolyt Pharma's shareholders to receive an additional contingent payment of \$250 million payable upon achievement of a specified regulatory milestone. The transaction is anticipated to close by the end of the third quarter of 2024.

On March 19 2024, AstraZeneca <u>announced</u> the acquisition of Fusion Pharmaceuticals Inc. for an upfront payment of around \$2bn and an additional ~\$0.4bn in potential contingent value rights. At the end of December 31 2023, Fusion had cash, cash equivalents and short term investments of \$234m. The transaction is anticipated to close in the second quarter of 2024.

On the FY23 earnings call it was mentioned that capital expenditure is anticipated to increase by ~50% in 2024, driven by investments in new manufacturing capabilities including API, new factory for inhaled products in China and investments in cell therapy. It is anticipated that BD payments in 2024 related to past transactions will be at about the same level as in 2023 (~\$2bn).

As of 31 March 2024, AstraZeneca had a net debt of \$26.4bn.

12. Currency impact

As mentioned above, if average March 2024 foreign exchange rates were to remain for the remainder of 2024, it is anticipated that Total Revenue would face a low single-digit adverse impact and Core EPS would incur a mid single-digit adverse impact (previously low single-digit).

Appendix for contributing sell-side analysts (references are made to an Excel spreadsheet distributed separately)

Guidelines for completing the template

Please enter your data into the orange shaded cells. All other cells will fill in automatically. **Please do** not alter the format of the template (for example by adding or deleting rows) and wherever possible please submit your information to us in this newly issued template rather than in an historic version

Tab 1 (Income Statement - AZ Group) should be completed on an as reported basis. We continue to capture the expected currency effects on total revenue and earnings, and the currency assumption of major currencies against USD. We are again seeking to supplement this with additional data (see details for schedules requested under tabs 2-5). **Tab 2** (Income Statement - Core) should be completed on a Core basis.

Tab 3 (Alliance Revenue) outlines the partnered medicines for which Alliance Revenue is anticipated. **Tab 4** (Collaboration Revenue) will capture upfront payments and milestone receipts.

The costs associated with the AZ restructuring programme should be outlined separately on **Tab 5** (Restructuring). Detailed commentary is always welcome to provide clarity and to reduce the scope for misinterpretation.

Tab 6 (Summary Cash Flow & Balance Sheet) consists of an abbreviated Cash Flow Statement and Consolidated Statement of Financial Position. Product sales data by both region and medicine should be entered into **Tab 7** (Group product sales). Total product sales are linked from the Income Statement tab in row 9 and is then broken down by region in the reconciliation in rows 11-29. If Rest of World product sales are not currently forecast to the level of detail in the template, please enter a total ROW forecast in row 17.

We continue to collect medicine forecasts by geographic region for a number of medicines. Please complete the rows shaded in orange where regional breakdown of forecasts is available (ROW is a sub-total of Europe, Est. ROW & Emerging Markets).

For some of the medicines in collaboration (*Enhertu*, Dato-DXd and tezepelumab), we are also collecting WW forecasts (rows 517-519, memo lines only). We anticipate this will allow analysts to reflect the appropriate financial treatment of these collaborations as it relates to sales, collaboration revenue and costs of goods sold.

Please note we continue to request information on pipeline risk adjustments and we hope you share our view that this is a valuable addition to the collection: If you use a risk adjusted approach to forecasting pipeline product sales, please enter your product sales forecasts after risk adjustments, as before, but also provide the probability of success % where asked for in the template (i.e. if you include 75% of product sales in your Income Statement, the probability of success is 75%).

If you use a binary approach, please enter 100% next to the included medicines and 0% where you have actively decided to exclude product sales. Please leave blank where you have simply not considered a certain potential medicine (e.g. because of its stage of development).

Peak sales estimates are collected on **Tab 8** (Pipeline peak sales). Please provide the probability of success (POS) if using a risk adjusted approach – if not risk adjusted, please enter 100%.

Please return to <u>christer.gruvris@astrazeneca.com</u> by **Wednesday 8 May 2024**.

Should you have any queries on how to complete this template, please do not hesitate to contact Christer Gruvris. In return, we will provide a consensus core and reported P&L for AstraZeneca Group, which will give you a good view of market assumptions. We will also provide consensus detail for Collaboration Revenue, Restructuring costs, Summary of Cash Flow & Statement of Financial Position, and product sales split by Region (providing sufficient analysts complete).
